The heart of The Monroe Institute programs is the Gateway Voyage. This is a six-day intensive, experiential learning adventure. The Gateway Voyage provides tools that enable: development and exploration of human consciousness; deeper levels of self-discovery; expansion of one's awareness; willful control of that awareness; communication with and visits to other energy systems and realities.

Various programs include six day, short program and weekend programs that can enhance mental abilities, resolve emotional conflicts, enhance feelings of deep relaxation and inner calm and more.

Nonprofit research and educational facility for all interested parties. The Monroe Institute is devoted to the premise that focused consciousness contains definitive solutions to the major issues of human experience. Greater understanding of such consciousness can be achieved through coordinated research efforts using an interdisciplinary approach.

Online store offers videos, meditation, inner balance, visual meditation, apparel and more.
