The American Heart/Stroke Association's research dollars support outstanding projects exploring all aspects of Cardiovascular Disease (CVD) and stroke. To encourage early-career investigators who have appropriate and supportive mentoring relationships to engage in high quality introductory and pilot clinical studies that will guide future strategies for reducing cardiovascular disease and stroke while fostering new research in clinical and translational science, and encouraging community- and population-based activities.

Research grants awarded by the American Heart Association in pediatric research include:

- cardiovascular development
- congenital heart disease
- Kawasaki disease
- endocarditis
- stroke
- cardiovascular health and risk factors in children
- gene therapy
- surgical therapy
- and tissue engineering

Parents, family and friends who have a specific passion for supporting efforts in children's heart disease can be assured that a significant portion of the money raised in the American Heart Walk will support pediatric heart and stroke research and education.
